

# Pease don't copy and paste these ideas. Make them your own. Explain what any type of Chinese drone ban would do to your business or hobby.

## Senator Scott's Amendment Talking Points:

- My name is [NAME], and I live in [CITY OR ZIP CODE]. I am calling to urge you to the Scott Amendment to the FY 2025 NDAA since it includes the overly restrict and purely political Countering CCP Drones Act language..
- **Share your personal reasons for opposing this bill, how it impacts your business, hobby, public safety, or research.**
- The bill would prevent leading drone manufacturer DJI from bringing new products to the U.S. market and could possibly ground the drones people like me already own and use for public safety, business, research and for entertainment.
- It would hamper public safety efforts, putting lives on the line, and drastically reduce the drone market, leading to rising costs and product shortages for all users.
- Despite what some U.S. drone manufacturers claim, there is nothing available to replace the DJI and/or Autel drones used in almost 100% of all First Responder fleets. This will literally ground those fleets, and end up costing U.S. cities's lives. Would you like to reach out to the loved ones of those victims and explain why the responding Search and Rescue people weren't allowed to use the best equipment available to them?
- According to one recent study, 67% of small businesses that use drones would be forced to close if they could no longer use them.
- The study also found that hundreds of thousands of Americans across the country would lose their jobs, hurting the American economy.
- Despite what the bill's authors may think, DJI takes data security very seriously.
- As of June of this year, DJI no longer allows users to upload flight logs from the U.S. This is in response to the unfounded fear of data being collected. DJI has gone out of their way to show they are security minded.
- My drones, controllers and apps can be used entirely offline – no internet connection required – eliminating the possibility of data leaks so this bill isn't needed.
- Again, please oppose the Scott Amendment to the FY 2025 NDAA since it includes the overly restrict and purely political Countering CCP Drones Act language.
